

# JOHN PAUL DE JESUS

## Senior Full-Stack Developer

Metro Manila, Philippines | +63 999 926 4736 | johnpaul.q.dejesus@gmail.com  
github.com/polenginlabu | linkedin.com/in/johnpaul-q-dejesus

### PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 9+ years of experience building and supporting production web and mobile applications across transportation, healthcare, and enterprise operations. Led frontend and backend development during a legacy modernization initiative, contributing to the launch of 2 web applications and 1 Flutter app while remaining responsible for legacy customer support. Core expertise in Vue.js, Node.js, Nest.js, Laravel, and Flutter, backed by hands-on experience in API integration, automated testing, and production troubleshooting. Integrates AI-assisted coding, testing, and code review into development workflows.

### TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, PHP, Dart, SQL, CSS

**Frontend:** Vue.js, Nuxt.js, Quasar, React.js, Angular, Aurelia.js, jQuery

**Backend:** Node.js, Nest.js, Laravel, REST API development and integration

**Mobile:** Flutter, Ionic Framework, React Native

**Databases:** MySQL, MongoDB

**Infrastructure and Integrations:** Docker, Firebase, SAP, FHIR API

**Monitoring and Support:** Datadog, performance monitoring, error investigation, GPS/map troubleshooting

**Testing:** PHPUnit, Cypress, automated testing, end-to-end testing

**Development Practices:** Git, Agile/Scrum, Jira, legacy application modernization, production support

**AI-Assisted Development:** OpenCode, Claude, DeepSeek; agentic coding, AI-assisted testing and code review

### PROFESSIONAL EXPERIENCE

#### CoDev | Senior Full-Stack Developer

Makati, Philippines (Remote) | January 2025–Present

*TransAct — transportation management and real-time tracking platform supporting a multi-fleet network across 100+ schools.*

- Develop and maintain backend services and frontend interfaces for EZRouting and EZAT using Node.js, Nest.js, Aurelia.js, and Vue.js, supporting fleet routing and transportation management.
- Design and maintain REST APIs and reusable UI components across core products to support real-time routing and vehicle tracking.
- Build and maintain 4 Flutter/Dart mobile applications: EZA2B, Where's the Bus, SD360, and EZArrival, including parent-facing bus location and arrival tracking.
- Investigate customer-reported GPS and map issues affecting vehicle location visibility in transportation applications.
- Use Datadog to monitor application performance and investigate errors during production troubleshooting.

#### Freelance | Full-Stack Developer

Remote | July 2024–January 2025

- Delivered full-stack web applications using JavaScript, PHP, Laravel, and SQL, from requirements through implementation, debugging, and testing.
- Built a Laravel-based project management application with task tracking and team workflow features.
- Developed Italian Living, a property-listing platform for residents of Italy, implementing listing management and property search.
- Delivered a companion Flutter application that extended core web functionality to mobile users.

## PROFESSIONAL EXPERIENCE — CONTINUED

### **Rendition Digital Inc. | Full-Stack Web Developer**

Philippines | November 2022–July 2024

*Electronic patient hospital records system deployed across approximately 30 hospitals.*

- Led frontend and backend development during the transition from a legacy application to its replacement, while continuing to manage all customer queries for the legacy system.
- Contributed to the launch of 2 web applications and 1 Flutter mobile application during the modernization effort.
- Built and maintained patient-record management interfaces and backend functionality using Nuxt.js, Quasar, Vue.js, and Laravel.
- Integrated the FHIR API to support standardized clinical data exchange across the hospital network.
- Implemented PHPUnit tests for Laravel backend logic and Cypress end-to-end tests for the hospital management system to validate functionality before release.
- Containerized application environments with Docker to maintain consistency across development, staging, and production.

### **Kaisa Consulting | Full-Stack Web Developer**

Philippines | May 2019–November 2022

- Developed enterprise applications, including an inventory and point-of-sale system deployed for an Australian client, using Node.js, Laravel APIs, and Vue.js.
- Built integrations with SAP, Firebase, and MySQL to synchronize transactional data across business systems.
- Implemented frontend features using React.js and Vue.js and integrated them with backend services.
- Wrote automated tests with PHPUnit and used Docker to maintain consistent development and staging environments.
- Delivered features within Agile teams, using Jira for work tracking and sprint coordination.

### **Miyens Technologies | Full-Stack Web Developer**

Philippines | May 2016–April 2019

- Progressed from frontend development with JavaScript and jQuery to full-stack development with Laravel and MongoDB.
- Designed and built a proprietary web authoring tool that enabled instructors to create and publish e-learning content.
- Developed interactive e-learning courses using Ionic Framework for cross-platform delivery.

## SELECTED INDEPENDENT PROJECTS

### **Devocean | Devotional Tracking Application** — Laravel, Vue.js, MySQL

devocean.website — Built a devotional web application end to end, including an interface for recording and tracking daily devotion activities.

### **Maddox Jewelry | Livestream Commerce Application**

Independently built a livestream-selling application for jewelry sellers, including in-app admin chat for direct communication with buyers about products and purchases.

## EDUCATION

### **Bachelor of Science in Information System**

University of Caloocan City | April 2016
